About Us

Oriental Steel Manufacturing Ltd, was established in January 13th 2005, located in the industrial area in Lusaka, the capital city of the Republic of Zambia. Oriental Steel is a medium/large scale manufacturer in construction materials, Fencing Products and polymer products. Its main campus spans 20,000 square meters holding the main production facilities, in addition, the several storage warehouses has a total area of 14,000 square meters. The well decorated show rooms and sales offices occupies an additional 5,500 square meters. The company has over 100 local employees and 6 engineers and staffs from overseas. In over a decade time, Oriental Steel has grown from a small factory to the nation's leading manufacturer that also has many customers from several nearby countries. The Chambishi Branch is under construction now .It is 20,000 squares meters.

Some of the most successful products manufactured at Oriental Steel includes various kinds of nails, conforce wires, fencing wires, brickforce wires, roofing sheets, flush doors, PVC ceiling boards, PVC pipes and polymer products. Furthermore, Oriental Steel is a key agent that sales high quality steel products imported from reputable companies that meets international standards. Some of these includes deformed bars, angle bars, MS plates, universal beams etc.

About us

Brief Description

Oriental Steel's long term dedication to serve customers with top quality products have gained them loyal customers all over Zambia and the nearby countries. Its customers ranges from end-consumers to hardware stores, and from construction companies to bulk dealers and is expected to continue to expand its customer base in the upcoming years.

The success at Oriental Steel has made the management aware the great responsibilities that comes with it, and has thus been dedicated in developing a philanthropic company culture. The happiness of its employees, the high quality products, competitive prices and user friendly services is the company's eternal goal. Oriental Steel will continue pursuing its goal and moving forward with everlasting passion.

Our Vision

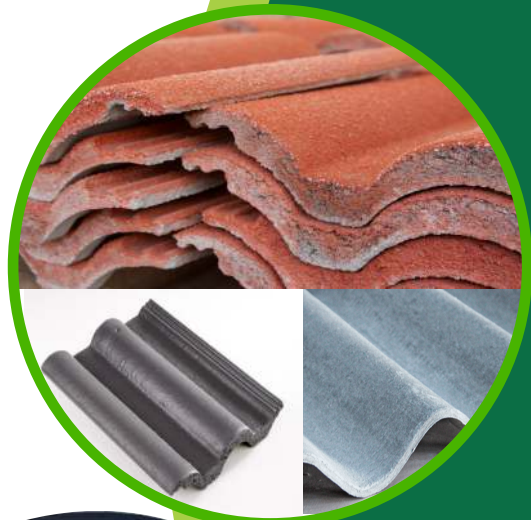

To delivering quality products and ensure that our clients are satisfied.

Our Mission

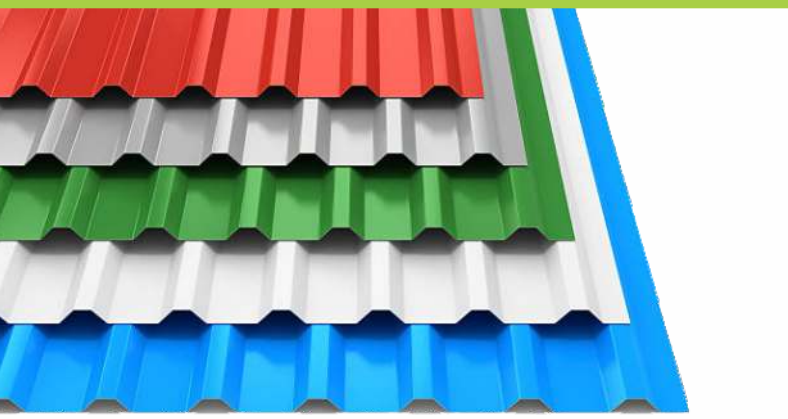

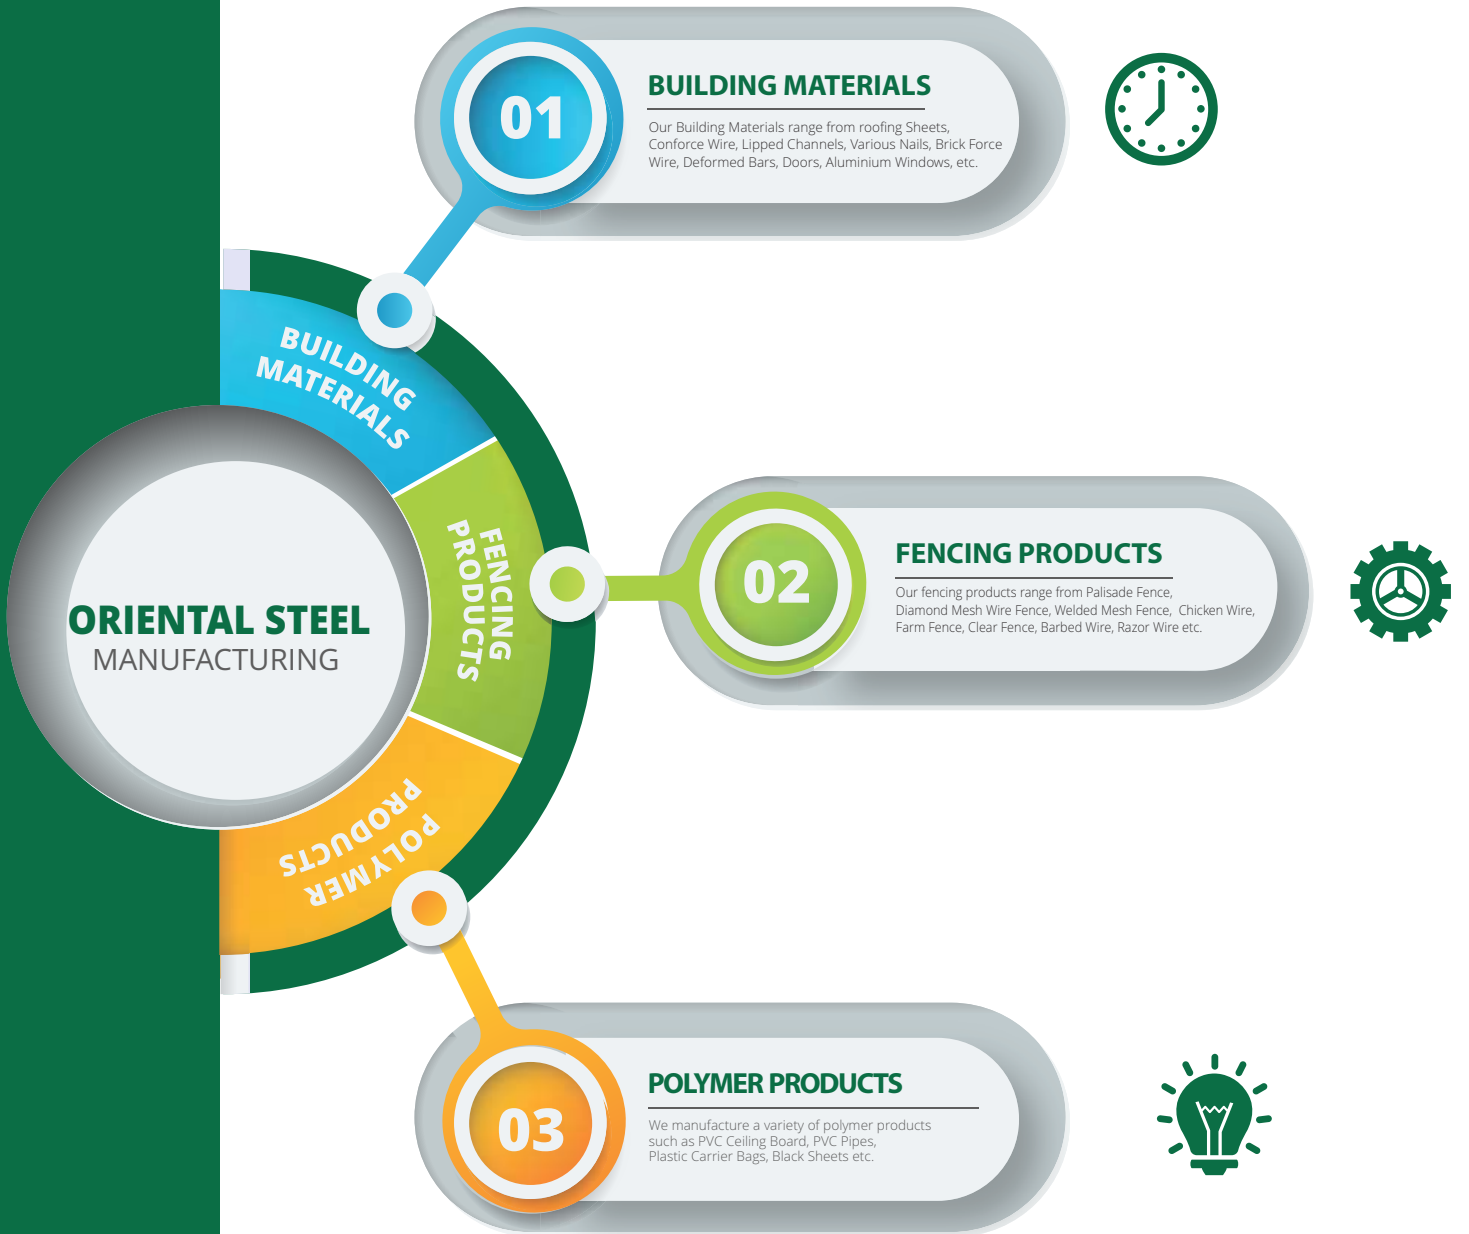

"To build and create value by delivering products, and services in a cost effective ways"

Our Goal

Is to develop into a well-established and respected Zambian Steel and Manufacturing Company.

OUR PRODUCTS CATEGORY

Fencing Overview

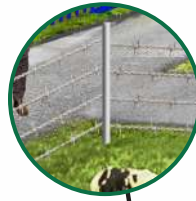

Welded Mesh Fence

Palisade Fencing

Razor Wire Fencing

Diamond Fencing

Chicken Wire Fencing

Barbed Wire Fencing

Farm Wire Fencing

Diamond Mesh Wire

Product Description:

The Diamond Mesh Wire fence is a common fence that is widely used. It is most often used to protect industrial properties, sports facilities, residential houses, farms and other properties, but also features in a number of other applications. It consists of galvanised-coated wire mesh fencing net and robust fencing posts of square or round steel in a number of different heights.

Welded Mesh Wire Fence

Description

Welded Mesh Fence is a fencing system that keeps its shape and gives a professional impression. The vertically and horizontally running grating bars are spot-welded to each other in cross bonds.

It has strong wires which are bent and welded to each other in cross bonds that help the fencing preserve its shape. This results in a user-friendly setup.

Product Advantages

Strong system, lovely design. Approximately 3 meter wide.

Farm Mesh Wire Fence

Product Description

Farm wire fencing is a permanent fencing type, available in a wide range of fence heights and horizontal spacing, usually constructed on the farm/field perimeters to control livestock, protect crops and enclose pastures

The following are some of the great reasons to install this fence on your farm:

Product Advantages

Livestock:

Fences can be used to keep livestock from wandering off or getting into areas they're not allowed in. If your farm is near a road, a fence protects your animals from getting into unfortunate accidents with vehicles. Fences can also separate animals that cannot live in the same space.

Fence Installation Boundaries:

A fence installation around the perimeter of your farm protects your crops and livestock as well as any other buildings from unwelcome guests. The addition of a fence creates a barrier that makes it harder for intruders to get onto your farm property and clearly demarcates the property line you share with your neighbor.

Palisade Fence

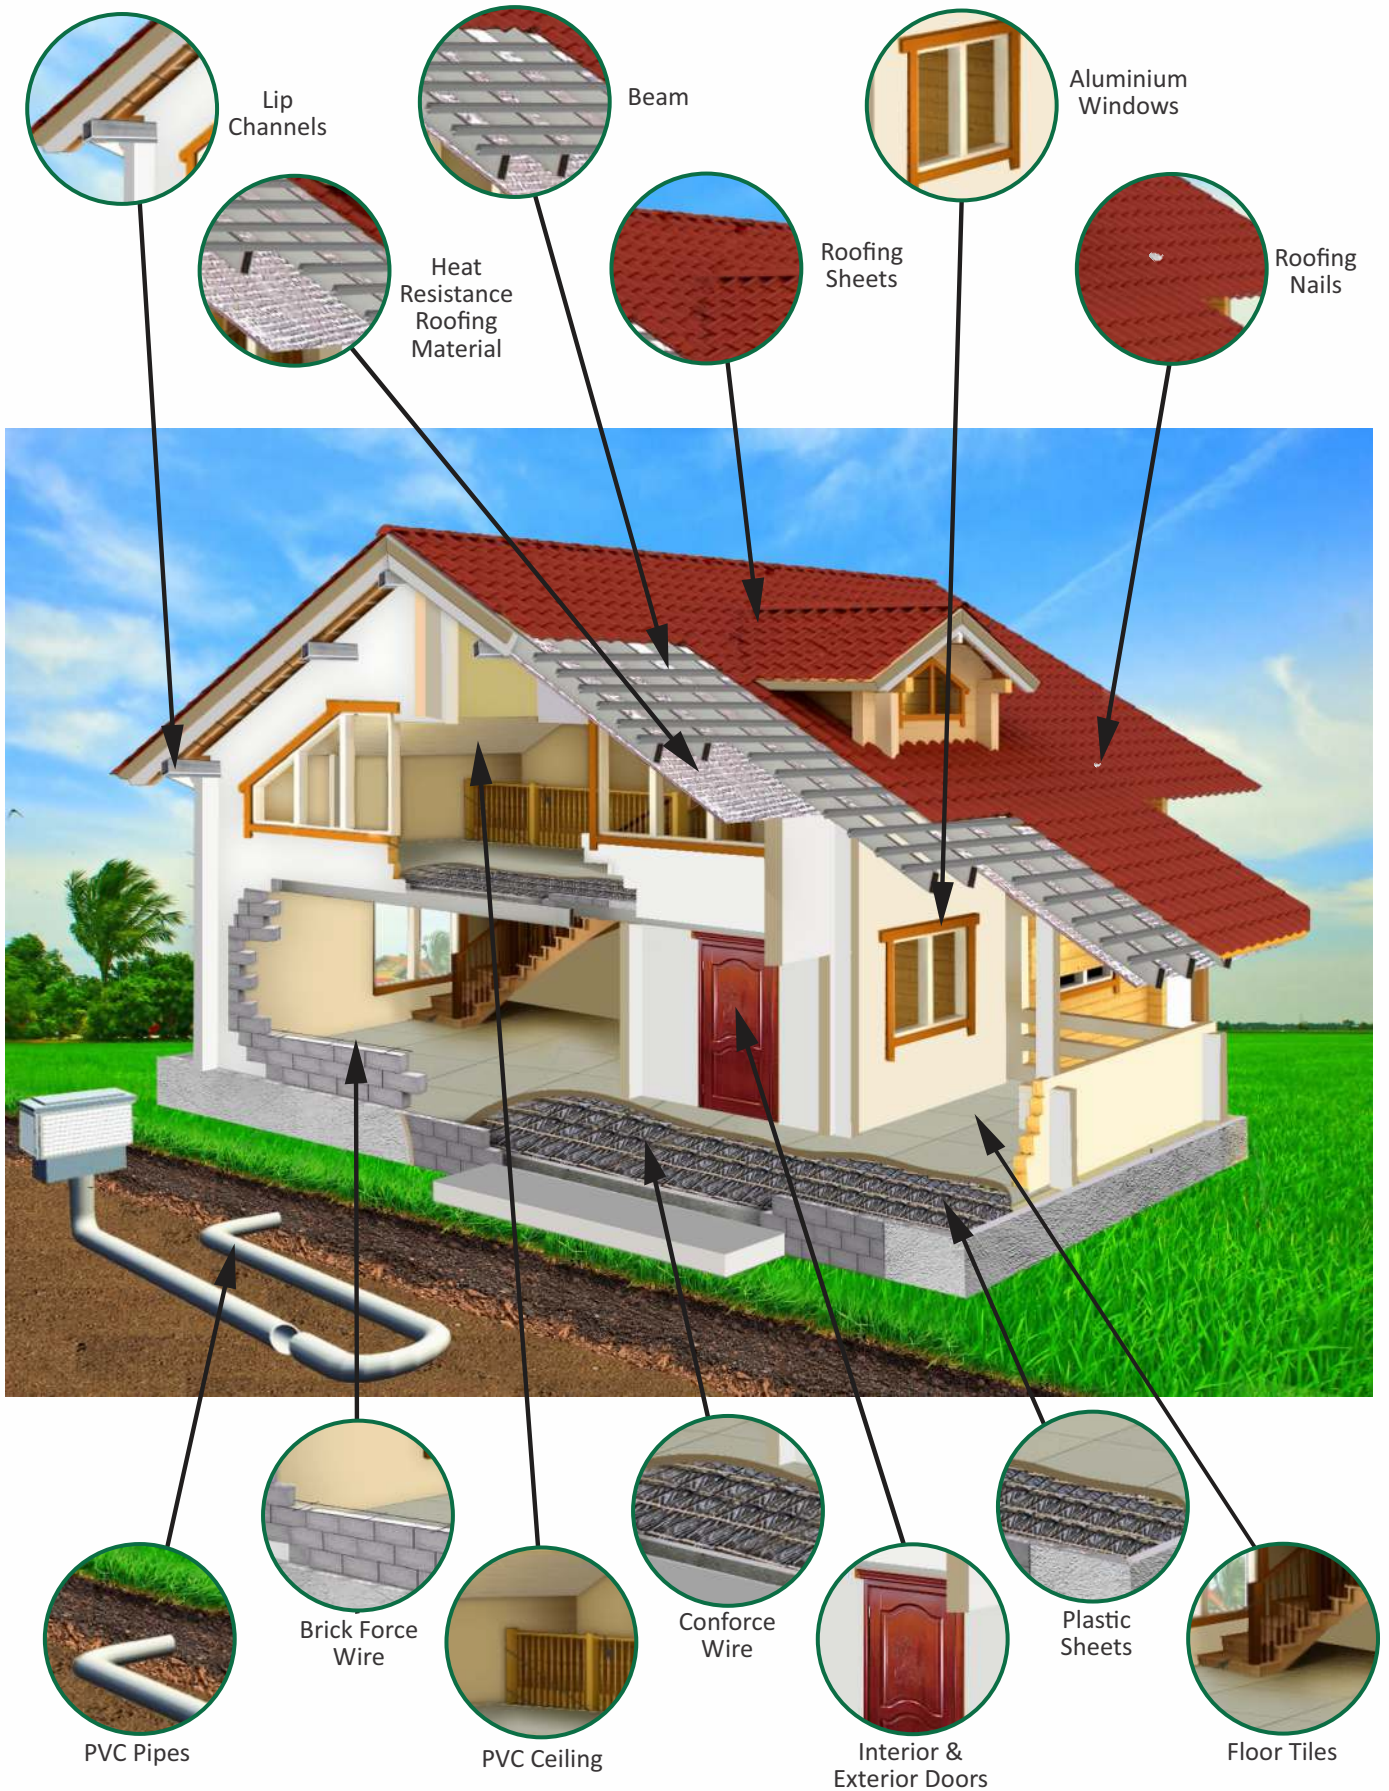

Product Description

Palisade fencing is designed to provide a formidable barrier. It is manufactured by combining substantial hot-formed and cold-rolled steel sections, assures both strength and rigidity and offers a proven long lifespan.

Palisade fencing is widely accepted as the industry leader. It provides protection, as well as acting as a significant deterrent, against most common forms of attempted intrusion and criminal damage. The Palisade fencing range offers excellent protection for differing levels of perceived risk, from low-risk fencing for demarcation purposes for both homes, offices, factories and industries which is designed and manufactured to meet the demands of critical national infrastructure, financial facilities and sites of strategic importance.

Building Materials Overview

Tying Wires

Oriental Steel offers precoiled Tie Wires available in black annealed and gavalnised. Black annealed and gavalnised tying wire can be used for a wide variety of applications, they are soft and malleable so can be bent, twisted and tied. Tying wire is necessary for connecting loose rebar or binding on construction or building-site to prevent any movement of the reinforcement during pouring and curing.

Black Annealed Wire

Galvanised Wire

Product Description

TYING WIRES

Tying Wire is used in applications where extreme ductility is required. They are used for tying purposes in the building, construction, galvanising and manufacturing industries.

Nails

Oriental Steel offers a variety of quality nails ranging from, roofing, steel nails, wooden used in carpentry, pallets and other general purposes. In carpentry or wood working and in the installation of roofing materials in the construction. Nails are most commonly used to fasten pieces of wood together, but they are also used to install roofing sheets and masonry.

Roofing Nails

Steel Nails

Wire Nails

FLUSH DOORS

Windows and Doors

Windows

Aluminium windows are an elegant and convenient solution that offers several advantages. Aluminium – it means safety, durability, warmth and comfort, longevity, good appearance, comfortable operation of the window and excellent harmony with any type of architecture and indoor interior. Aluminium is light, durable, environmentally friendly. It is highly resistant to environmental impact; aluminium does not corrode nor loses its excellent physical properties even with drastic temperature fluctuations.

Hollow Core Doors

Oriental Steel manufactures doors of any dimensions and define the image of your homes but also effectively protect the warmth and comfort against uninvited guests.

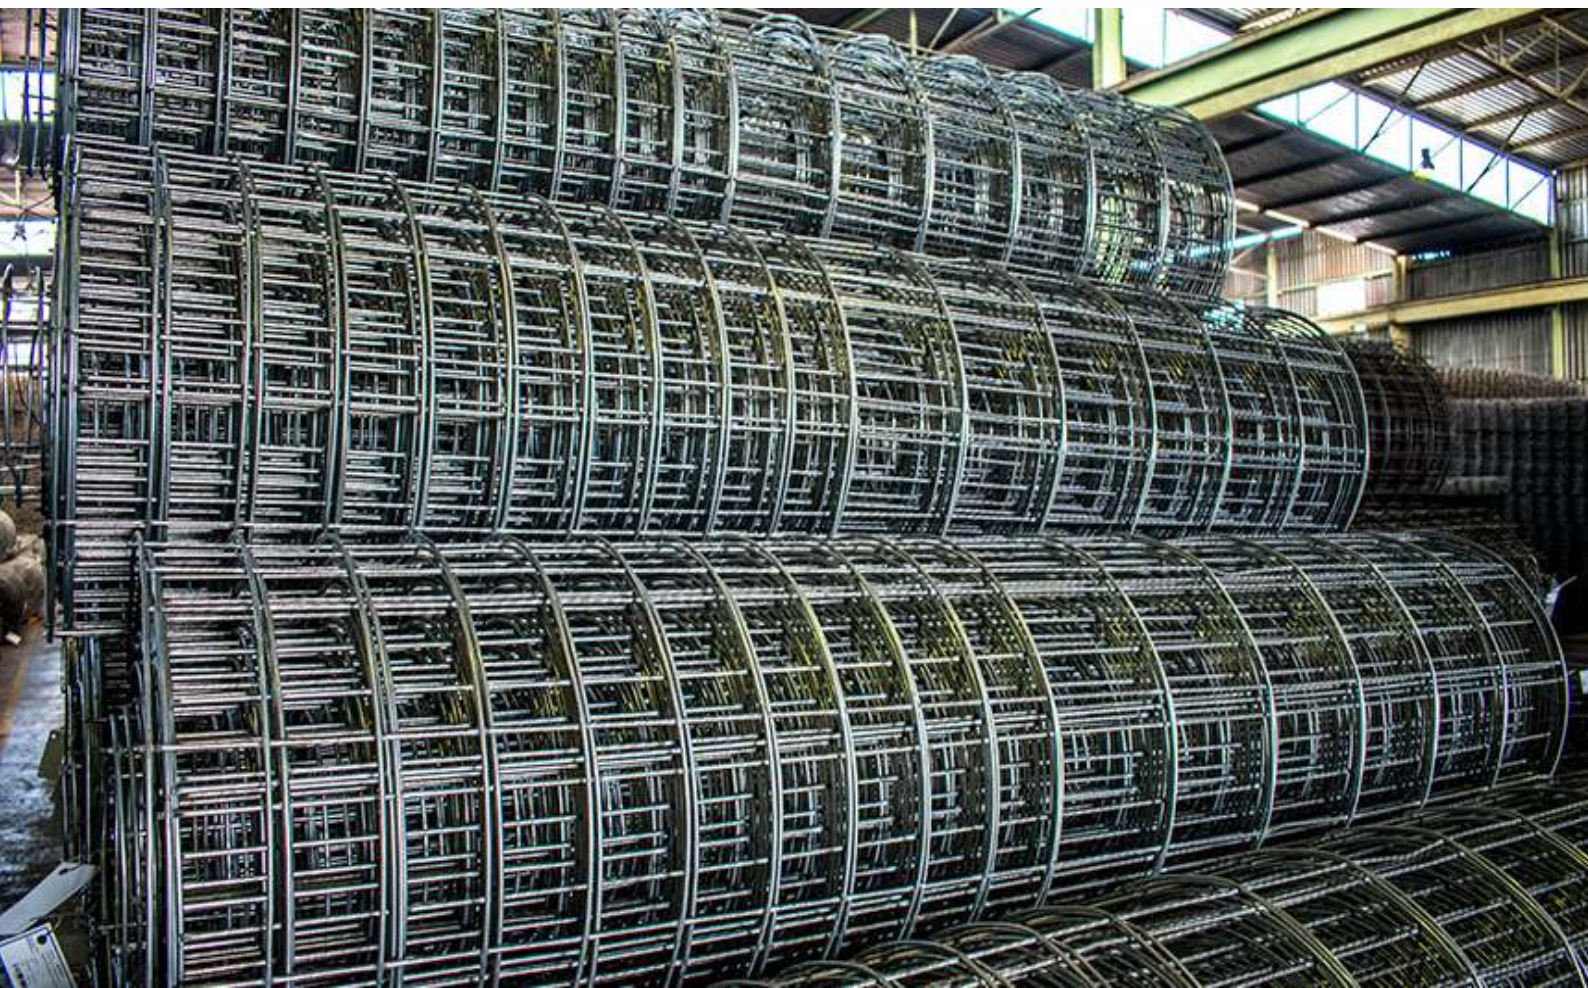

Hollow-Core Door Benefits:

- Cost less than solid wood doors.
- Lightweight makes them easier to install.
- Hollow core makes them less susceptible to expansion and/or contraction.
- Are often pre-primed making painting easier

Designed Doors

Reinforcement Wire Mesh

Product Description

Conforce Wire

Conforce wire is manufactured from welded wire fabric or prefabricated steel reinforcement material and comes in a variety of sizes most commonly square grid or rectangular patterns. It is a general purpose steel mesh that is used for a wide range of applications including driveways, patios, house slabs and commercial / industrial applications.

Brickforce Wire

Brickforce is designed for structural reinforced masonry applications and consists of two main parallel wires joined by in-line welded cross wires. It adds strength to help wall panels cope with lateral wind loads, allowing the designer more flexibility and the bricklayer an easier product to handle and position.

Other Products

Steel Products

Oriental Steel's long term dedication to serve customers with top quality steel products such as beams, lipped channels, rectangular bars deformed bars etc.

Barbed & Razor Wire

Barbed tape or razor wire is a mesh of metal strips with sharp edges whose purpose is to prevent passage by humans. ... The multiple blades of a razor wire fence are designed to inflict serious cuts on anyone attempting to climb through and therefore have a strong psychological deterrent effect.

Chicken Wire

Chicken wire, or poultry netting, is a mesh of wire commonly used to fence in fowl, such as chickens, in a run or coop. It is made of thin, flexible, galvanized steel wire with hexagonal gaps.

Plastic Carrier Bags

Product Descriptions

Plastic Rolls

Our black plastic sheeting comes in many varieties, sizes, and mils and can be used in landscaping, organic gardening, construction, and general protection against dust, moisture, rain and dirt. We also manufacture plastic carrier bags and plain bags, that are used in supermarkets, shopping malls and market places.

PVC Pipes

It's commonly used for plumbing and drainage. PVC stands for polyvinyl chloride, and it's become a common replacement for metal piping. PVC's strength, durability, easy installation, and low cost have made it one of the most widely used plastics in the world. PVC pipes are used in a wide variety of piping applications, from transportation of drinking water over drainage solutions to advanced fire-sprinkler systems

PVC Ceiling Boards

PVC Ceilings. A ceiling system made of interlocking PVC panels that is quick and easy to install and has a number of great benefits when compared to traditional gypsum ceilings. A range of accessories compliment the panels and allow for edging, corners and finishing. This popularity owes to a unique combination of properties: safety, durability/cost-efficiency, environmental performance and recyclability.
